**Stick to sanctioned strength: JU teachers**

The department may have teachers but the effective strength is 12. You are serving as vice-chancellor and you don’t know about this. The vice-chancellor of a university does not take such a serious responsibility on the back of the department and dean of arts,” a teacher said.

Biswas has requested the authorities to take responsibility for the admission of 13 teachers, the department can no way accommodate more than 10 students beyond the sanctioned strength. If errors in evaluation come to light during the admission, the authorities decided to conduct an open re-examination based on complaints that a number of students who had scored below 70% in the entrance exam were given 70%.

The merit list for the supernumerary quota course beyond 70, which we are operating here, is not equipped to handle more. The department may have strength, citing inadequacies in handling a bigger class. The issue has been referred to a higher authority.

**TORO RobotOlympiad 2018**

The regional competition saw a total of 21 schools participating in two categories in the undergraduate and junior level. Students were enthusiastic, their parents were enthralled. They couldn’t stop expressing their joy when their robots started to work. Father: Navin is happy and proud of his son. His son introduced him to robotics as he had no interest. Even I tried to teach him that he was a computer engineer and had no interest in tech. But he said at times he has to do it because it is his passion.

Sindhu Khanolkar, 16, said she had been dabbling with robotics for three years. The last two years, since she joined class 10, she continued to pursue her passion along with her studies.
