A fresh look at education

A modified panel discussion on ‘Institutionalized Education’ was held in The Sreekrishna School, Kochi and Amrita Vidyalayam School at Kochi. The discussion was organized by the Parents’ and Teachers’ Association of Sreekrishna School, Kochi. The event was attended by the students and faculty of the Schools.

The discussion was to explore and learn the role of schools, both as an institution-builder and custodian of the cultural traditions. The discussion revolved around the role of schools in modern education and how they have evolved over time.

The discussion was divided into two parts. The first part was a panel discussion, and the second part was a student presentation. The panel discussion was moderated by Brinda Mohan, followed by a student presentation by Soumya Suresh and Parthasarathi P. The discussion was followed by a question-and-answer session.

The panelists included Soumya Suresh, Parthasarathi P, and Shyamala V. They shared their insights on the role of schools in modern education and how they have evolved over time.

Soumya Suresh said, “Schools have a very important role to play in the development of a child. They not only educate the students but also inculcate values in them.”

Parthasarathi P said, “The role of schools is not just to impart knowledge but also to develop the personality of the students. They should also be a platform for students to explore their interests.”

Shyamala V said, “Schools should be places where students can express themselves freely. They should also be places where students can learn from their mistakes.”

The discussion was well received by the students and faculty, who appreciated the panelists for their insights.

A race to save centuries-old relics of Israel’s coast

Unwater archaeologists have been working on the Mediterranean coast for years, but now they are focusing on the coast of Israel. The researchers are trying to save the ancient relics that are threatened by erosion and erosion.

The researchers are using the latest technology to study the relics. They are using a drone to capture images of the relics. They are also using a special camera to capture images of the relics.

The researchers are also using a 3D printer to create a replica of the relics. They are also using a 3D printer to create a replica of the relics. They are also using a 3D printer to create a replica of the relics.
